

We make one line of work: garden and field hand tools, forged and formed metal first — behind other people’s brands.

Birdland Ind. is a Taiwanese OEM manufacturer, not a trading company. Trowels, pruners, shears, loppers, hoes, forks and spades leave this floor under the customer’s label, never under ours: no retail arm, no house brand, no competing channel. Every programme passes three signed control gates — engineering, tooling and inspection — across qualified Taiwan and China origins.

52 Years of OEM manufacturing, since 1974	180+ Programmes manufactured behind customer brands	9 Material families run on this floor	76 Process, material & packaging options, documented and rated	159 Material routes documented across 38 part types

PROCESS CAPABILITY

Rated from the factory's own encyclopedia data: ● how common in European & North American DIY retail · ● relative cost within its group. Ordinal judgements about the channel, not measured market data. Full notes: birdland.com.tw/manufacturing.html

Material intake	Tooling	Inspection & testing
Blade & spring steel	Progressive dies	Hardness sampling
Stainless steel	Single-station dies	Open/close cycle life
Aluminium	Trim & pierce tools	Salt-spray hours
Rigid plastics	Injection moulds	Dimensional AQL
Grip compounds	Welding jigs	Edge & function check
Timber	Assembly fixtures	Joint pull test
Fabric	Gauges	Pack drop test
		Barcode & label check
Forming	Joining & assembly	Material families
Stamping	Riveting	Blade and spring steel
Hot forging	Bolted joints	Stainless steel
Cold forging	Snap-fit	Plating and coating
Laser cutting	Press-fit	Aluminium
Tube drawing	Spot welding	Rigid plastics
Tube bending	MIG welding	Grips and soft compounds
Swaging	Brazing	Timber
Wood turning	Over-moulded joints	Fabric and textile
Injection moulding	Adhesive bonding	Packaging board
Two-shot over-moulding		
Dip moulding		
Heat treatment	Finishing & marking	Packaging formats
Through hardening	Zinc plating	Corrugated export carton
Quench & temper	Nickel-chrome plating	Colour box
Induction (local) hardening	Dacromet	Hang tag / header card
Solution annealing	Powder coating	Blister pack
Stress relief	Wet paint	Skin pack
Hardness banding by grade	E-coat	Paper-and-plastic composite
	Anodising	Shrink film
	Polishing	Label set
	Sand-blasting	Void fill
	Lacquer or oil on wood	Strapping
	Heat transfer print	Pallet
	Laser marking	

SAMPLE TO MASS PRODUCTION

Specification & quote typical 1-2 wks Drawings or samples reviewed; route and tooling question answered.	Sampling / first article typical 2-4 wks On existing tooling. Signed gate: engineering.	Tooling, if new typical 6-10 wks New dies or moulds, design-OEM only — skipped on existing tooling. Signed gate: tooling.	Pilot run typical 1-3 wks Approval quantity through the full line and pack.	Mass production typical 4-8 wks Per order, size-dependent. Signed gate: inspection.

WHO THIS FACTORY SERVES

- DIY retail private label

European & North American chains putting a garden tool range on the shelf under their own name.
- Importers, distributors & buying groups

Programme supply with tooling ownership, sample discipline and documents in writing.
- Professional & grounds-care brands

Heavier specifications, cycle-life and coating standards for daily professional use.
- Agricultural & field-tool programmes

Field tools — hoes, mattocks, machetes, cultivators — alongside the garden line.

START THE CONVERSATION

birdland.com.tw/contact.html routes your enquiry to the regional desk for your market and product line. Drawings, prices, specifications and approvals continue in private email — never on the public site.

Certifications & audit reports: available on request through your regional desk.
